Pau Fandos Gorris

Software engineer · Java, Spring, Angular and AI

linkedin.com/in/paufandos paufandos.com/en/ github.com/paufandos

Software engineer with over five years of experience. I integrate AI models into existing systems and build systems and applications with Java, Spring and Angular. I work autonomously and can cover the full software lifecycle, from analysis to testing. I study Computer Engineering at the UOC.

WORK EXPERIENCE

Cygnus Source

Software developer

July 2025 - present · Madrid

I integrate AI models into existing business systems: I analyse their data and how it is structured and adapt them so AI models can work with them. I develop conversational assistants, MCP clients and servers and microservices behind a gateway with Java and Spring, and the applications with Angular. I work autonomously and use AI coding agents during development.

Java 21 · Spring Boot · Spring AI · Spring Security · WebFlux · Spring Cloud Gateway · Oracle · Elasticsearch · Angular

Sopra Steria

Software developer

March 2023 - July 2025 · Valencia

I developed microservices with Java and Spring Boot, worked on event-driven integration and relational databases, business processes and Angular. I applied TDD in Scrum and Kanban teams. On a critical, demanding project I played a key part in delivering it on time, and I presented results to clients.

Java · Kotlin · Spring Boot · Camunda · Axon · RabbitMQ · Apache Artemis · Oracle SQL · PostgreSQL · Jenkins · Angular

Imagina IT Solutions

Software developer

March 2021 - August 2022 · Sueca · Internship

I developed websites with PHP, JavaScript and MySQL and designed their interfaces.

HTML · CSS · JavaScript · PHP · MySQL · Bootstrap · WordPress

PROJECTS

fandOS

I develop this app to plan the day on iPhone, iPad and Mac. It works offline and syncs with my API. An AI assistant queries and modifies data through its MCP server. Private code.

Swift · SwiftUI · TypeScript · Cloudflare Workers · D1 · MCP

agent-kit

I built a JavaScript CLI for working with Claude Code, which coordinates, and Codex, which reviews every change. It installs the rules and skills for both, checks their usage and logs tool failures. Private code.

JavaScript · Node.js · Claude Code · Codex

Adivina la palabra

Final Web Application Development (DAW) project, completed during my internship at Sopra Steria from March to June 2023. The backend picks the secret word, checks each guess and returns the hints.

Java · Spring Boot · Hibernate · MySQL · Angular · TypeScript

EDUCATION

Bachelor's Degree in Computer Engineering

Universitat Oberta de Catalunya (UOC)

September 2024 - present · In progress

Higher Diploma in Web Application Development

CIPFP Mislata

September 2021 - June 2023 · Final mark: 9.43/10

Diploma in Computer Systems and Networks

IES Blasco Ibáñez

September 2019 - June 2021 · Final mark: 9.67/10

AWARDS

Gold · CV Skills 2023

I won gold in web development at the Valencian Community championship.

Spain Skills 2024

I represented the Valencian Community in web development at the national championship.

SKILLS

Java and Spring

Java · Spring Boot · Spring Security · Spring Cloud Gateway · WebFlux

Angular

Angular · TypeScript · Tailwind CSS

AI

Spring AI · MCP · Integrating LLMs into existing systems

Data and processes

Oracle · PostgreSQL · MySQL · Elasticsearch · Flowable · Camunda

Architecture and testing

Hexagonal architecture · TDD · Vitest · Playwright

Development with agents

Claude Code · Codex · OpenSpec

LANGUAGES

Spanish and Valencian: native.

English: limited working proficiency.
